To Whom It May Concern,

This letter is being written as a testimonial to the many benefits we have experienced since installing the USES Technology devices installed by 1st Green Solutions Guam, LLC at many of our company locations in Guam.

In 2013, burn outs of our UPS units and other electronic equipment damages were occurring at our Harmon NAPA store location as a result of island power voltage issues. We contracted with 1st Green Solutions Guam, LLC which professionally installed a USES Power Conditioner device at our main panel. Since then we have not experienced the previous equipment damages. After the very successful results from the first installation we contracted to have the USES Technology Power Conditioner devices installed at (4) additional locations in Guam in 2014 and 2016.

In addition, we have experienced cost savings as the result of less maintenance costs, and less replacement of equipment costs.

I would highly recommend the USES Technology Power Conditioner devices for protection of all electronics, motors, A/C equipment and controls.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ven Medabalmi".

Ven Medabalmi
LLC Manager
